PRODUCT UPDATE - September 2010 (last update 30.11.2013)

Nozzles and spare parts for Denso® Common Rail Injectors suitable for many Japanese vehicles

In late 1995, Denso® launched its first common rail system and it continues to develop and improve it. In fact Denso® introduced in the European market in June 2002 a 1800-bar common rail system. Denso®'s common rail system achieved a high injection pressure and five-time multiple injections at a high accuracy. This system comfortably cleared Euro 4 emission regulations without a diesel particulate filter.

In Europe, many vehicles like Primera, Almera, Tino, and X-Trail of Nissan®, MPV and Mazda 6 of Mazda® and Avensis of Toyota® are equipped with this system. In Japan and in many other countries Hilux and Prado of Toyota® and light truck ELF of Isuzu® are equipped with this system.

Check out our nozzles for these injectors.

PRODUCT UPDATE – March 2009 (last update 30.11.2013)

Nozzles and spare parts for Bosch® Common Rail Injectors for traditional and multijet injectors

We actually have in our line **90 nozzles** suitable for Bosch® Common Rail systems and we are now ready to offer also a wide range of spare parts for repairing injectors.

Common Rail is the present and the future and will also break through in the emerging markets in Asia as a result of increasingly strict emissions standards. Modern Common Rail diesel engines use up to 30 per cent less fuel while emitting up to 25 per cent less carbon dioxide (CO₂).

Check out in next pages our **new Common Rail products**.

Nozzles and spares for Piezo Common Rail Injectors suitable for Continental® system (ex Siemens VDO®)

The worldwide first high-pressure diesel injection system with Piezo injectors was the forerunner Continental® Common Rail Diesel System.

The Piezo Common Rail direct injection system, the first of its kind in the automotive industry, takes common rail technology a step further by advancing the efficiency and power of diesel engines. In 2007 Continental® bought Siemens® VDO Automotive AG becoming one of the top 5 companies in the automotive industry.

These systems are very popular on Citroën®, Ford®, Jaguar®, Land Rover®, Mazda®, Nissan®, Peugeot®, Renault®, Suzuki®, Toyota®, Volvo®.

Check out our parts for these injectors.

Gasket Kits for Common Rail Pumps suitable for Bosch®, Delphi®, Denso®, Continental® systems

Common Rail is the present and the future and will also break through in the emerging markets as a result of increasingly strict emissions standards. Modern Common Rail diesel engines use up to 30 per cent less fuel while emitting up to 25 per cent less carbon dioxide (CO₂).

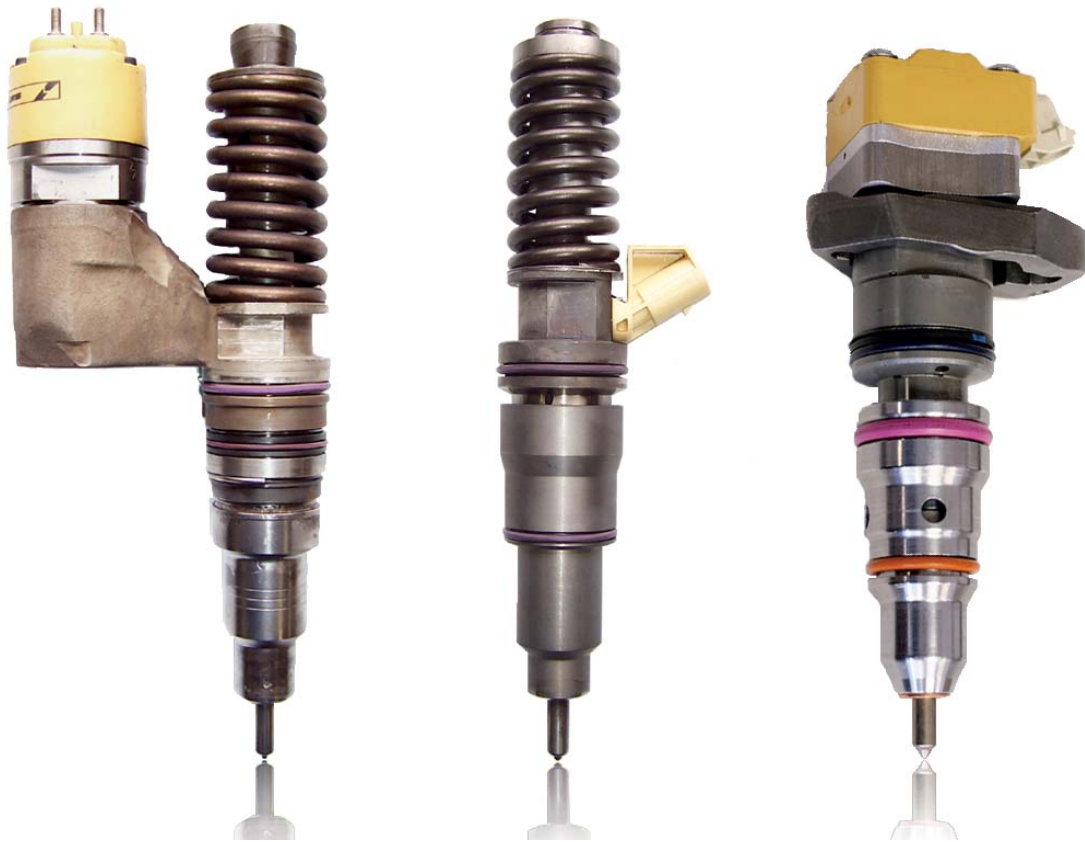

We increased our line including gasket kits to repair **Common Rail Pumps**.
Our kits are equivalent to OEM and our quality standard is very high.
All our kits are made in Europe.

Check out our parts for Common Rail pumps.

Nozzles and spare parts for Electronic Injectors EUI/EUP/HEUI Suitable for Delphi®, CAT® and Navistar® systems

The **Electronic Unit Injector (EUI)** system was developed by Delphi® in the 1990s, for use in large diesel engines, to meet the challenge posed by increasingly stringent emissions legislation. The **Electronic Unit Pump (EUP)** system is essentially the same technology as EUI but designed specifically for engines with camshafts situated within the cylinder block. The **Hydraulic Electronic Unit Injector (HEUI)** is an electronically controlled unit injector hydraulically actuated.

These systems are very popular on CAT®, John Deere® and Volvo® vehicles.

Check out our new parts for Electronic Unit Injectors.

Nozzles and spare parts for Unit Injectors UIS/UPS suitable for Bosch® systems

The **Unit Injector System (UIS)**, also known as the pump-nozzle system, is a diesel injection system developed in 1994 by Bosch®, combining the injection pump and the injector nozzle in a single component. The **Unit Pump System (UPS)** was introduced in 1995, the feature of the UPS is that each engine cylinder has a unit pump of its own.

These systems are very popular on Audi-VW®, Iveco®, Mercedes®, Scania® and Volvo®.

Check out our parts for Unit Injectors.

Pressure regulators (DRV valve) suitable for Bosch® Common Rail Pumps for all main applications

We added in our line 11 pressure regulators for **Bosch® Common Rail pumps**. The pressure regulator is attached to the body of the high pressure pump and its function is to regulate and maintain the pressure depending on the load condition of the engine. It is controlled electronically by EDC module.

Check out in next pages our **new** Common Rail products.

SEVEN DIESEL defends the true "made in Italy"

Italian and European laws state that a product can be defined as "made in Italy" only if the design, drawing, manufacturing and packing phases of production are carried out entirely in Italy. The "made in Italy" marking gives the end user the ability to recognize the origin of the goods they purchased and protects those people who invest, manufacture and create jobs in Italy.

We at Seven Diesel respect this law by marking our products "made in Italy" and give our customers the certainty they are purchasing items with "made in Italy" quality standards.

"Made in Italy" quality is not random. "Made in Italy" quality means experience, know how and modern, technological machinery. "Made in Italy" quality equals our pride, our effort, our satisfaction to be able to manufacture quality products.

"Made in Italy" quality represents the history of Italy.

Please choose the real made in Italy, choose Seven Diesel products

We present
our new packing for nozzles
more environmentally friendly and anti-counterfeiting

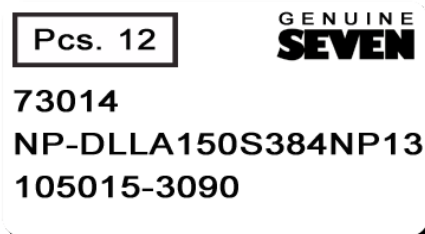

We studied a double security system to avoid the counterfeiting of our products. An hologram label is used to seal the boxes, in case of removal the word "VOID" remains on the box, and the label cannot be used anymore. On the front label the word "SEVEN" is printed with a security ink which creates a light polarisation effect that can be seen through a special double filter.

All our new packing are completely recyclable. We are also introducing a new label manufactured with 100% recovered fibres.

This paper has been awarded the NAPM and Blue Angel recycled mark, because it is chlorine free and made without harmful chemical.

NEW LABEL

Security ink with polarisation effect visible with special filter

Our labels are 100% recycled

HOLOGRAM

VOID pattern is revealed on the label permanently if the label is tampered with and removed.

It is impossible to reuse the label once the VOID pattern is revealed.

It has recently been brought to our attention that some Chinese companies are selling low quality products and passing them off as Seven Diesel parts. We know exactly who they are and we will do all we can to stop the selling of our counterfeited products. The Seven Diesel brand is recognised in the World as a quality alternative to the genuine parts; they are trying to make profit from our brand and we can not accept that. Where practical, we also registered our trademarks, Seven® and the Seven logo®, worldwide (also in China) and they may not be used without our written permission. Any illegal use will be prosecuted.

It's now possible to pay via
Credit Card
 Easy, fast, safe!
