To achieve maximum results it is important to use the proper package size for each tire. As a rule of thumb, the amount of Counteract required per tire is based on one ounce per thirteen pounds of tire. If you are using our throw in bags, open & discard outside bag only & throw clear inner bag containing Counteract directly inside tire cavity. If you are not using an applicator and pouring the contents of the bag directly into the tire it is imperative that none of the contents of the bag ends up on the bead seating area of the tire and rim. Counteract disclaims any responsibility for air loss or tire damage due to improper installation or air check. In order to reduce the possibility of valve leaks, the use of a Counteract valve core and a metal CBB valve cap is recommended and included in every bag of Counteract. Counteract is TPMS compatible.
