[Specifications](#)

Captn. Jack's has assembled a great navigation package, offering the best hardware, the Motion LE1700 Tablet PC, Maptech Navigator software, Microsoft Streets and Trips, and a Bluetooth GPS. Giving the ultimate in flexibility and portability, this package enables you to plan your route at home, or in your berth at night, and then navigate in real time whether you're in the pilothouse, the bridge or at the navstation. Even use it on your next road trip! The Motion LE1700 computer is Windows-based with an Intel® Core® Solo Processor U1400, only 7/8" thick, less than 3 pounds, has 512Gb RAM and a 30 GB hard drive, and features the "view anywhere" LCD screen.

The included Maptech Navigator software features a stylus friendly interface for easy use in heavy seas plus ALL U.S. raster charts, 3D-Contour, aerial photos and more!

Package includes: Motion's CD/DVD drive, Emtac S3 GPS sensor with Bluetooth capability, Maptech Navigator software, Microsoft Streets and Trips, and a case.

DVD/RW Optical Disc Drive

The Motion DVD +/- RW Optical Disc Drive (ODD) combines the functions of a DVD player/recorder and a CD player/recorder into a single external drive. It provides the ability to read and write popular formats, and lets you choose the media format most compatible with your requirements. Included are: Nero, a robust software solution to read, write, author or playback DVDs, a standard AC power adapter, and a drive stand for using the drive horizontally or vertically to accommodate your space needs. Note: **the Motion Accessory Cable** is also included. Use the Motion Accessory Cable with your LE-Series Tablet PC, Convertible Keyboard or MobileDock to power your drive when traveling or wherever a standard wall outlet is not available. The AC adapter includes adapters to quickly convert to UK, Europe or Australia power outlets. Features a USB 2.0 High-Speed connection, making the Motion DVD **◆** RW ODD the right solution for those interested in quality, speed and portability.

NOTE: For Motion C5 or F5, you must have the Docking Station for connectivity.

**The Motion DVD RW DVD is on backorder until 4/30/2008.**
