

NEW FOR 2007...PRO COMP JEEP!

If hardcore Jeep enthusiasts had it their way, every commute would have some of the Moab Rim, Sledgehammer or their own trail thrown in to separate the serious rigs from the others.

Pro Comp Suspension is committed to increasing the off-road performance of the 97-06 Jeep TJ/LJ/Rubicon and here is the collection of goodies to do it.

New “Boxed” Lower Control Arms
New boxed lower control arms increase weld area around the bushing eyelet for improved strength. There are now specific front and rear arms that can be mounted traditionally with the bend down or upside down for improved break-over angles. The front arms are formed to eliminate tire scrub at steering lock. Sold in pairs. Included in our latest Stage II 4” TJ/LJ lift system for 2003-’06 models.

Part No.	Description
55200	97-06 TJ / LJ / 84-01 XJ / 93-98 ZJ Front Lower Arms
55400	97-06 TJ / LJ Rear Lower Arms

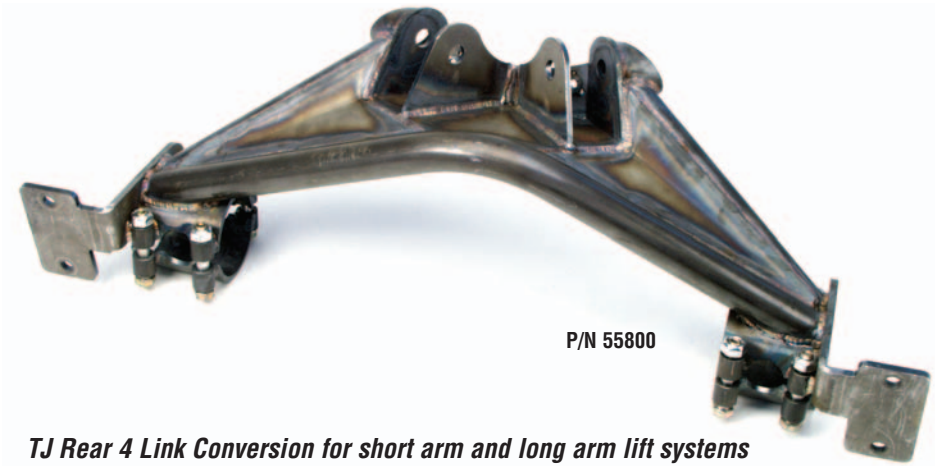

New Adjustable Upper Control Arms
New adjustable upper arms are available to fine tune front caster angles. Adjustable rear arms allow rear pinion angle tuning for use with or without a CV rear driveshaft and transfer case tail shaft kit.

Part No.	Description
55100	97-06 TJ / LJ Adjustable Front Upper Arms
55700	97-06 TJ / LJ Adjustable Rear Upper Arms

TJ Sway Bar Disconnects 3”-5” Lift
These sensible and simple sway bar end links are the key to maximum off-road articulation. Simply remove the lower retaining pin, disconnect the links and fasten them to retention clips placed on the sway bar. No loose or dangling parts to worry about. Don’t forget to reconnect for optimum on road performance.

Part No.	Description
55506	97-06 T J / LJ

TJ Rear 4 Link Conversion for short arm and long arm lift systems
This fabricated rear axle truss comes complete with specially designed upper arms to create ideal four-link geometry. This bolt on 4-link conversion eliminates the factory rear track bar, allows maximum articulation and eliminates torque steer inherent in a lifted Jeep TJ. Take advantage of superior off-road articulation, excellent on road handling and increased durability. Exhaust modification required for installation. Extended brake lines required (If extended sway bar links are not being used they will be required for 3-5 inch lift systems).

Part No.	Description
55800	TJ / LJ 4 Link Conversion

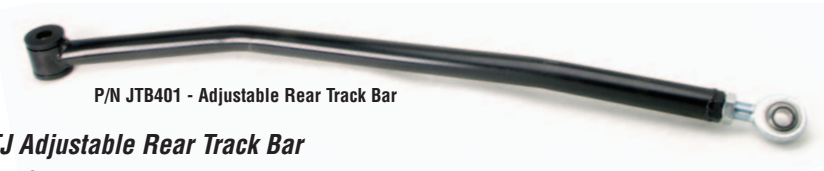

TJ Front Track Bar Bracket
This crafted heavy duty track bar bracket lowers the track bar mounting point by 3” to preserve the factory steering and suspension operating angles. This bracket combined with the JTB400 adjustable track bar and YJ400 pitman increases suspension travel and eliminates bump steer.

Part No.	Description
55300	97-06 TJ / LJ

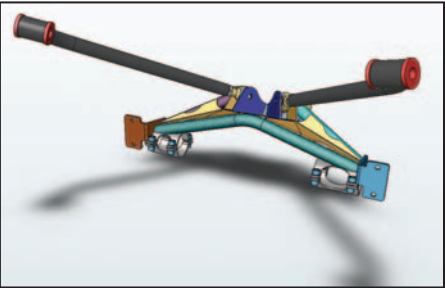

Adjustable Front Track Bar
Pro Comp Suspension’s high quality adjustable track bar is a trail smart upgrade for any system with 2” – 5” suspension lifts. This adjustable track bar keeps the front axle of a lifted Jeep in the correct location to reduce bump steer and to keep the vehicle tracking down the road straight. Manufactured from U.S. 4130 chromoly tubing and includes an aircraft quality high angle rod end for the frame mount. Grade 8 hardware and durable urethane bushings complete this U.S. made suspension upgrade.

Part No.	Description
JTB400	97-06 TJ / LJ / 84-01 XJ / 93-98 ZJ

TJ Adjustable Rear Track Bar
Pro Comp has the proper solution for accurate location of the rear axle and changes in pinion angle when a tail shaft kit and CV driveshaft are installed; P/N JTB401 adjustable rear track bar is made of 4130 chromoly tubing like our front track bars and uses the same aircraft quality high angle rod end to allow full articulation.

Part No.	Description
JTB401	97-06 TJ / LJ

TJ Steering Box Protector
Way better than a pocket protector. This 3/16” thick custom fabricated steering box guard will prevent any harm to the hardware that allows enthusiasts with boulders on the brain to steer their TJ into or onto large immovable objects.

Part No.	Description
55500	97-06 TJ / LJ

- Rear pinion adjustment cams P/N 20-65225 can be used for tuning pinion angle for minor driveline vibration correction.
- Removal of front skid plate on vehicles with automatic transmissions is required for driveshaft clearance when transfer case lowering hardware is used.
- Coil spacer P/N 55496 can be used to increase front ride height by 1" when additional accessories (winch, winch bumper, trail equipment) are added.
- P/N 90-6048B contains 16 bushings and 8 bushing sleeves.
- Box kit P/N 55699B, includes Pro Comp Suspension's latest one-piece front track bar drop, P/N 55300B, adjustable front track bar and a drop pitman arm. 03-06 models only.
- 1. Box kit P/N 55499B, adds Pro Comp Suspension's exclusive cross link braced front track bar drop and a drop pitman arm. 97-02 models only.
- 2. All ride height increases are approximate and will vary due to vehicle specifications (engine size, factory suspension options , trail equipment, etc).
- 3. Driveline modifications may be required for height increases over 2" due to increased driveline angles.
- 4. Add "G"to the end of crawler bumper P/N for gunmetal gray finish.
- 5. Front and rear lower arms, transfer case lowering hardware, and extended sway bar links included in all 4" box kits.
- 6. Transfer case lowering hardware kit P/N 55589 (97-02 only) can be used for minor driveline vibration correction.
- 7. Optional steering stabilizer available P/N 219200.

New for 2007 TJ Stage II Suspension System

Pro Comp Suspension's new 4" Stage II Jeep TJ MX6 suspension lift system has features that will crawl over those other "ultimate" kits. This top end short arm kit includes new boxed construction lower control arms that can be mounted upside down for improved break-over angles. A one-piece front track bar mount with chromoly adjustable track bar provides excellent steering manners and optimum suspension articulation. The front sway bar disconnects allow for maximum articulation. These components are combined with spring rates and MX6 shocks that TJ enthusiasts worldwide have come to appreciate.

K3083BMX – 4" LIFT

K3056B – 4" LIFT

Extended Brake Line Kit
Stainless Steel Brake Line kits are designed to replace stock rubber brake hoses on vehicles with increased ride heights of 4"- 6". See page 65. P/N 7450

TJ CV rear driveshaft P/N 4042

P/N JTB401 - Adjustable Rear Track Bar

Pro Comp Suspension has the proper solution for accurate location of the rear axle and changes in pinion angle when a tail shaft kit and CV driveshaft are installed; P/N JTB401 adjustable rear track bar is made of 4130 chromoly tubing like our front track bars and uses the same aircraft quality high angle rod end to allow full articulation.

1. Driveline modifications may be necessary.
2. All ride height increases are approximate and will vary due to vehicle specification (engine size, factory suspension options , trail equipment, etc).
3. Pitman arm is used on vehicles with power steering only.
4. Leaf spring bushings are included in P/N 55089B kit.
5. Add "G" to the end of crawler bumper P/N for gunmetal gray finish.
6. Transfer Case Tailshaft Kit P/N 4007 and CV rear driveshaft required. See sidebar.
7. Coil spring conversion kit.

System Features

- Industry #1 selling CJ/YJ lift springs
- Progressive are diamond cut springs
- Coil springs designed and rated exclusively for the YJ
- Spring rates ideally suited for heavily equipped vehicles
- YJ box kits include: front and rear track bar relocation brackets, extended sway bar links, extended bump stops, front U-bolts and transfer case lowering hardware
- 4" pitman arm available for CJ's and YJ's with power steering
- Extended braided stainless brake lines available for positive break response
- MX6 suspension packages available

K3061B - 2.5" LIFT

Coil Spring Conversion System Features

- 5" lift provides clearance for 33" tires on 8" wide rims
- 10" of functional wheel travel
- Coil springs designed and rated exclusively for the YJ
- Trac bar relocation brackets and dropped forged pitman arm
- Includes ES9000 shock absorbers
- MX6 suspension packages available
- ES2000 steering stabilizer included
- 4-link chromoly series control arms
- Complete bolt on installation

Coil Spring Conversion System - 5" LIFT

Hot Options!

see pages 100-108

Hot Options!

- Tailshaft conversion kit/CV rear driveshaft.
- P/N 4007 for NP231 transfer case only
 - P/N 4041 driveshaft fits 94-96 models only
 - P/N 4040 driveshaft fits 87-93 models

Crawler bumper allows steep approach and departure angles. P/N 66163 & P/N 66165.

Stylish and functional bolt-on auxiliary light bar P/N 13000. See pages 102-103 more lighting details.

Steering Brace helps support the Jeep steering box. Easy installation, complete with instructions. P/N 55060B & P/N 55070B.

Hi-capacity heat-treated aluminum front differential covers available for CJ and YJ. See differential covers page 107 for more details.

Important Ordering Notes

Premium MX6 6-way adjustable gas stabilized shock absorbers are available. See pages 74-75 for more details.

1. All ride height increases are approximate and will vary due to vehicle specification (engine size, factory suspension options , trail equipment, etc).
 2. Cherokees are equipped with different diameter rear axles. Use P/N 50055 rear U-bolts for 2.75" diameter. P/N 50050 for 3.25" diameter. Please determine axle dimensions before ordering.
 3. Vehicles equipped with light duty, double offset joint (rubber boot) front driveshafts must be replaced with Spicer constant velocity (CV) type if driveline vibration occurs. Additional driveline modifications may be required for height increases over 2".
 4. Coil spacer P/N 55496 can be used to increase front ride height by 1". Recommended for Cherokee when using P/N 53111 rear springs.
- * Replacement rear spring bushings P/N 90-3801 are sold as a set for one P/N 53111 spring.

Important Ordering Notes

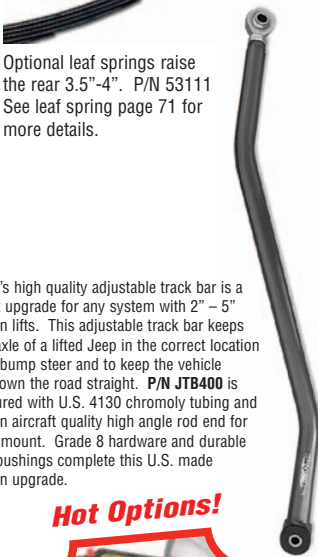

Hi-capacity heat-treated aluminum rear differential covers available for Dana 35 rear axle. See differential page 107 for more details.

Ideally suited to level your vehicle. In stock form or for vehicles with winches, snow plows, motor conversions, etc. Sold in pairs. P/N 55496. See page 70.

Optional leaf springs raise the rear 3.5"-4". P/N 53111 See leaf spring page 71 for more details.

Pro Comp's high quality adjustable track bar is a trail smart upgrade for any system with 2" – 5" suspension lifts. This adjustable track bar keeps the front axle of a lifted Jeep in the correct location to reduce bump steer and to keep the vehicle tracking down the road straight. P/N JTB400 is manufactured with U.S. 4130 chromoly tubing and includes an aircraft quality high angle rod end for the frame mount. Grade 8 hardware and durable urethane bushings complete this U.S. made suspension upgrade.

Pro Comp Suspension System Features

The original midsize Cherokee XJ and Grand Cherokee ZJ have become very popular among the enthusiast off road crowd because of their competence and comfort. These vehicles off road capability can be improved without high dollar modifications. Pro Comp offers affordable systems that include tubular chromoly lower control arms that glide over rocks. These arms use unique, reverse hour-glass urethane bushings that increase off-road articulation and do not compromise on road handling. Ideal spring rates combined with optional mono-tube adjustable MX6 shock absorbers or twin tube hydraulic shocks provide excellent road and trail manners. Necessary components like a front track bar relocation bracket and extended sway bar links complete trail worthy packages that can make it a little easier to reach your off road destination.
